Facility and Program Coordinator
AeroSpace Environmental Impact Traveling Exhibit
NASA Glenn Research Center
21000 Brookpark Road, MS 6-4
Cleveland, Ohio 44135

Dear Linda J. Cognata,

On April 20, the AeroSpace Bus visited Springfield Elementary to the delight of the students and teachers. We would like to thank you and your team for this highly educational experience. It accomplished its mission by promoting careers in technology and space science. Our students were very interested in the video and were eager to find out more about NASA and NASA Glenn Research Center. Major Rich Lonardo certainly captivated the students and prepared them to view the video. Local media was eager to cover this event and two stations taped the event for their community news segment.

Thank you for providing the funding to enable the bus to visit. Mr. Howard Eakin was an asset to a fine experience. We thank him for his time and dedication. The bus arrived on time and we were able to keep to the schedule we had arranged.

We have had many positive comments from the students and teachers who participated in this experience. Thank you for making this special experience a reality.

Sincerely yours,

Linda Campbell
